Concept 3

Key Features

- Direct connection to Wyoming Avenue via underpass or overpass at the railroa
- New access road connecting to New Burton Road
- Continues with improvements along Wyoming Avenue out to US 13

Potential Benefits

- Performance improvement for North Street intersections with Saulsbury Road, Wyoming Mill Road and West Street
- Improved connection to US 13 for trave to north-east destinations
- Avoids adverse affects to Puncheon Run or Isaac Branch waterways, wetlands, floodplains and threatened and endangered species habitats

Potential Impacts

- Impacts regarding visual effect, right-of-way acquisition, noise and air quality may affect existing homes, businesses and community facilities at New Burton Road connection and on Wyoming Avenue

Key Working Group Thought

- Short and direct connection to US 13
- Does not help traffic going south
- Concerned about impacts to existing homes, businesses and community facilities on Wyoming Avenue and at connection point

WEST DOVER Connector
