

Welcome to New Castle Industrial Track Trail, Phase 3 public workshop!

The third phase of the Industrial Track Trail consists of a bicycle and pedestrian pathway and includes a new bridge span over the Christina River. This phase completes a key missing segment of the trail network, which when complete will extend from the City of New Castle to downtown Wilmington. This nearly 7 mile connection will include only two at-grade roadway crossings and connect dozens of adjacent communities.

Key components:

- Timber arch pedestrian and bicycle bridge over the Christina River
- Scenic paved trail and half-mile wetland boardwalk through the Russell W. Peterson Urban Wildlife Refuge
- Ramp connection between the wetlands and the DuPont Environmental Education Center, providing direct access to the Wilmington Riverwalk

Anticipated Schedule:

Advertisement – February 2016

Construction Start – Summer 2016

Construction Completion – Summer/Fall 2018

13

273

I-295 crossing: tunnel under the highway and trail connection to Route 13

0.5 miles
